Safe Work Method Statement SWMS-403

1. Hazard / Hazardous Event	2. Current Controls
Mopping Floor – Slips as a result of the floor being wet due to spot mopping	 Only team members who have been made aware of the hazards associated with mopping are to carry out this task, this awareness training is to be recorded in the team member training register. Wet Floor/Cleaning in progress signs are to be displayed on all approaches to the area being mopped. For spot mopping follow the steps below; Wet floor/Cleaning in progress signs are to be displayed at all approaches to the area to be mopped. The Cleaning Trolley is to be used as a barrier to prevent access to the area. The Mop bucket is only to be filled to a half (1/2) full to prevent splashes. The Mop is to be used with a bucket and wringer; the mop is to be wrung out until damp (a minimum of 3 times). Mop the floor with the damp mop. Once the spot mopping is complete, the area is to be dried using blue roll. Check the floor is dry. Once dry the warning signage can be removed. Never Leave a Wet/Damp Floor Unattended.
Hazardous Substances – For contact with all chemicals being used that are classified as a Hazardous Substance	 A Safety Data Sheet has been obtained for product being used. A risk assessment has been completed for any hazardous substance being used, Team members are to be briefed on their contents and the training recorded; see the Chemical SDS Register for Chemical Risk Assessments. Ensure PPE detailed in the SDS is worn. As a minimum this includes, rubber/latex gloves, goggles, non-slip footwear, long sleeve top and long pants.
Use of Hazardous Floor Stripping Solution	 Decant floor stripper in well ventilated areas away from other Team members. Use diluted solution of floor stripper (as per manufacturers recommendations) in well ventilated areas. Where skin contact with the floor cleaner occurs take off immediately all contaminated clothing and rinse skin with water or shower. If in eyes rinse cautiously with water for several minutes.
Cleaning Solutions – Frequent immersing of hands into water-based cleaning solutions resulting in potential skin conditions	 Check your skin regularly for signs of Dermatitis (eczema); such as dryness, itching or redness, and report any concerns to your Manager, who should inform the Health, Safety & Environment Department of concern. Wear disposable non latex gloves when carrying out cleaning tasks.
